

The diagram illustrates the structure of a protein-coding gene and its corresponding protein. The top section, labeled "Coding", shows a gene structure with exons (black boxes) and introns (lines with arrows). The bottom section, labeled "Non-coding", shows a gene structure with exons (black boxes) and introns (lines with arrows). The protein structure is shown as a series of vertical bars of varying heights and colors (black, blue, grey) representing different domains or regions.

■ Bromodomain
■ Not Analyzed
